

# RYAN GLAZER

Software Developer

I have always had a love for technology, in particular computers and the prospect of AI. I greatly enjoy problem solving and learning new things. Few things are as satisfying to me as seeing my code doing its tasks.

## SKILLS AND ABILITIES

- Java - MySQL - Javascript - HTML - CSS  
- JQuery - Git - Bootstrap - Paired Programming  
- Servlets/JSPs - Spring - Thymeleaf - JSON

## EXPOSURE TO

- C# - Python - React - Go  
- Unit Testing (Javascript)

## EDUCATION

### Codeup

Full Stack Web Development Program

Fully-immersive, project-based, and intensive 18 week full stack Java career accelerator that provides students with 600+ hours of expert instruction in software development.

## DEVELOPMENT PROJECTS

### Our Pueblo 3/2019

Web application to facilitate the translation of webpages from Spanish to English, using Java, Javascript, Spring, Thymeleaf and various APIs, most prominently Google Cloud Translate. The application will take a url, translate it then pass that that translation to a user to verify it and make changes if necessary. Afterwards an admin will review it and if he approves it the translated text will be ready for integration.

### Spring Blog 2-3/2019

Blog application built using Spring and Thymeleaf. Allows users to create, edit, delete and view posts that are saved to a MySQL database and upload files. Features user registrations, password hashing, user authentication and page securing, email notifications, ajax and various other technologies. Currently available at cool-stuff.cool

### Adlister 2/2019

Full stack web application designed to mimic sites like Craigslist. Allows users to register an account, create and edit their own ads as well as displaying an index of all ads. Utilizes MySQL as well as servlets and JSP. Includes a categories system for the ads as well as the ability to search ads, either by title and description or by categories

### Contact Manager 1/2019

Java application to manage contacts. Allows a user to create new contacts, including name, phone number and email address, list all saved contacts, search contacts by name, and edit and delete existing contacts. Data is saved locally and read from a file on the users computer so it can persist after the program is terminated. Includes auto formatting for phone numbers

### Movie Project 12/2018

Web application to display movies taken from a JSON database, as well as to add, delete, and edit movies in the database. Features a live search
